- **TRADITIONAL**
- **PRACTICAL**
- **BEST MATERIALS**
- **HIGH TOOL CULTURE**

Japan has a centuries-old tradition of clay plasters. The surface design of the clay walls is of prime importance. The best evidence for the cultural significance of this craftsmanship is provided by the multitude of tools with which Japanese plasterers apply, smooth and craft the clay.

We offer an extensive selection of Japanese trowels and stucco tools. A special focus is our range of trowels for the professional crafting of edges, valleys and plaster finishes.

More detailed information can be found on the ClayTec website claytec.de/en/product/japanese-towels/

Basecoat plaster trowel ARA-GOTE

Sturdy trowel made from Hon-Yaki steel to apply, spread and level coarse clay plaster. Blade 0.8 mm thick.
